HALIMBA HOME

HANDMADE DELUXE

We have always been happy to make new, unique products to show what kind of wonderful things can be made by glass. The passion, we are working on and the creativity keep coming up with new ideas and pushing for new results. All of these inspired us to show our creativity and knowledge not only among the tableware glass products, but also at home interior items to make our homes more beautiful.

With this in our mind, the design team of Halimba Home has created the first, new products in the Halimba Home range. We wanted to introduce ideas, that favor manual manufacturing over mass production and these new glass products are made in combination of other natural materials.

Beautiful creations, inspired by the harmony between human and nature, which fit perfectly into the inner spaces. The molding, forming of glass is a magical process himself and the stylish combination with natural materials is the beauty and the charm of the Halimba Home Handmade collections.

DISCOVER IT: to acquaint our customers with the beauty of the handmade creations and the high quality innovative, wooden products for your home. The design team of Halimba Home designs and achieve your ideas for your home.

WITH EXPERTISE: manufacturing of handmade glass products and alloying with other natural materials. High quality products are combined with the 20 years of manufacturing experience and with the reliability, which we represent on the world market. In addition to the tableware glass products, our goal is to offer home interior products for those people, who would like to make their homes more stylish and beautiful.

UNIQUE AND SPECIAL: because of the special properties of glass, the unique veins and composition of solid wood, there are no two pieces of the same . The beauty and naturalness makes it different from the usual, average products. It makes elegant, sophisticated and retains its naturalness in today' s world of plastic. The colour of the wood stain does not obscure the veins of the tree, preserving the origin of the tree as nature created it.

FOOTPRINT: we love the nature, so it is essential for us to think responsibly, let us focus on sustainability and maintain harmony between human and nature. We manufacture our glass and solid wood products with this approach.

MANUFACTURE: all of our products are made with heart and soul in our factory in Hungary. The skilled manpower, the selected raw materials and the carefully crafted products guarantee, that the customer will get an especial product, as each piece is made by hand, which are not only spectacular, but also perceptible. Each piece contains the dedication, experience of our colleagues and the charm of nature, as it embodied in the veins of the tree and the glitter of the glass.

NATURE INTO YOUR HOME: you can take a drop of nature into your home with the Halimba Home collections. An exclusive product created by combining solid wood accessories, regulates the humidity, and lives almost with you for generations.

CHANDELIERS

Chandeliers are one of the most beautiful forms of interior lightings. The origin of chandelier lighting go back to pre-Christ times. Many centuries later, in the 17th century, chandeliers take on the well-known classic shape.

These days one of the most widespread lighting idea is the chandelier lighting, especially popular for lobbies, larger halls and living rooms.

The Halimba Home 's Deluxe handmade chandelier lightings emphasize individual shapes, that fit perfectly in elegant forms to the modern city homes and for professional use also.
